PAGE 1 OF 2

SB01818 – Lease/Purchase of Digital Press

Bid Due at 3:00 PM on 12/15/2020

Purpose of Addendum:

Additional and revised specifications requirements

- a) Page 1 of 4 - Revised last sentence of first paragraph. The following sentence shall replace the original last sentence as follows:

Refurbished equipment may not be manufactured prior to the year 2015, AND, the refurbished equipment may not have more than 1 Million clicks on the counter.

- b) Page 1 of 4 - Revised third and fourth bullet point under A) minimum hardware requirements. Minimum printing resolution requirements, or equivalent

The University prefers 8-bit per color processing as this machine will be used in a professional print shop of the University and a high quality print production from that department must be of high quality.

Color depth is the ability of a single pixel to adjust its level or color or intensity to achieve a smoother appearance. For instance, 1 bit can be either 0% or 100%; either on or off. 2 bit can be 0%, 50%, 75%, or 100% of a pixel's color. The department has determined that 6-bit would be the minimum acceptable.

- c) Page 2 of 4 - Revised tenth bullet point under A) Minimum hardware requirements, Color Density Adjustment. Post Fusion density measurement is measuring the color density of a color on a printed piece of paper. This is a more accurate method of measurement of how the printed colors will look on a specific paper versus other papers.

The specifications states "(post fusing)" we are adding or similar process that achieves the same results as the process stated in the specification.

PAGE 2 OF 2

- d) Page 3 of 4 - Minimum Training and Configuration, or equal.

The G7 process Control Expert addresses the challenges of managing color across devices and workflows, defining how to integrate and maintain proven industry best practices and standards. This certification is not vendor specific and can be acquired by anyone.

Add " or a trained an qualified technician of the equipment manufacturer to provide assistance in managing color across devices and workflows" to first and second bullet points after G7 Expert from Idealliance,

- e) Page 3 of 4 – Minimum monthly service requirements. Add the following:

Expected response time is six (6) hours. The response time only includes working hours. It is expected that the response time and completion time shall be the same except when parts are not on hand and this shall be documented.

Expected service completion time is eight (8) hours. Service completion is defined as the time from the point the call is placed until the particular problem is resolved.

RECEIPT OF ADDENDUM SHOULD BE ACKNOWLEDGED WITH THE RESPONSE TO THE BID.
FAILURE TO ACKNOWLEDGE ADDENDA MAY BE CAUSE FOR BID NOT TO BE CONSIDERED.
